

Product Overview

Used PV modules • German stock • Container lots

STM 180 F

SunTechnics STM 180 F

Used polycrystalline PV module

This one-page overview is prepared by EuroPanel Supply for commercial use. **It summarizes the main characteristics of the SunTechnics STM 180 F** in a clear, customer-friendly format.

Technical data

Manufacturer / Brand: **SunTechnics**

Model: **STM 180 F**

Nominal power: **180 W**

Cell type: **Polycrystalline**

Dimensions: **1584 x 787 x 40 mm**

Weight: **ca. 14.5 kg**

Cells: **48**

Origin: **Made in Japan**

Commercial summary

Power density: 180 W per module.

Space efficiency: Older module generation. In practical terms, it delivers less power per square meter than modern modules, but can still be suitable for price-sensitive projects with sufficient installation area.

Typical use case: Secondary market, export business, bulk/container lots.

Visual condition: Used goods with age-related signs of wear possible depending on lot and storage history.

Sales format: Offered as used PV modules from German stock.

Commercial note

Used module data may vary slightly by lot, testing status and storage condition. This overview is intended for trade communication and does not replace a manufacturer datasheet or an individual lot inspection.
